Residential Water Softener

Water softener is used to reduce the hardness minerals and elements caused by calcium and magnesium which could be built up inside pipes, valves, and appliances to protect them from scaling, corrode and clogging up. Softened water can make the dishes cleaner and spotless and prolong the usage time of the appliances.

Components

Valve, Tank, Brine tank, Resin, Media

Feature

All- in-one equipment easily installed

Long service life and good performance

Famous brands of valves are available (Fleck, Fobrite, Manual)

Pentair Tanks and Purelite Resin.
